

## **Nu-Energie Does the UNTHINKABLE**

Feb 29<sup>th</sup> 2008

Blountville, TN., Feb 29th / PRNewswire/ -- Nu-Energie has now completed the construction of their 1<sup>st</sup> production line and does the UNTHINKABLE.

CEO/ Hulette “This goes to show you that we have done our homework and we understand how to make biodiesel, we were able to produce ASTM spec fuel our very first batch.”

We have tried to take a different approach to this industry and take out all of the human error and build a 100% completely automated system. We spent many months with our R&D team trying to think every step of this process through so we could eliminate unnecessary labor and human error. We feel that we have a leg up on our competitors because our system is truly one of a kind and our process is so much more efficient than any of the plants we have seen.

We have a lot to be proud of, we were able to turn our team of 7 guys into biodiesel experts, and we taught them how to become pipe fitters, welders, and electricians. Now anytime we have a problem our operators know and understand how to fix any problem that could occur.

### **About Nu-Energie**

Nu-Energie, LLC is a biodiesel producer, headquartered out of Blountville, TN which will take virgin oils and turn them into a clean renewable fuel on an annual rate of 5 million gallons.
