

Nu-Energie Starts Plant Construction

Nov 5th 2007

Blountville, TN., Nov 5th / PRNewswire/ -- Nu-Energie is now under way to complete and construct its first production line that has the capacity to produce 5 million gallons of clean renewable fuel from virgin oils.

CEO/ Hulette "This is one of the most exciting times we have ever seen in our lifetime is to be able to grow our own crops and turn them into fuel." We spent many months on planning and making sure we picked the right technology and we feel good about our equipment coming from Europe since they are so far ahead of us in biodiesel.

Many of the plants being built today are 100 MMgy plants that require a huge investment and have complicated logistics. We have taken a different view. We have cut out the logistical problems, and we distribute the biodiesel locally without a lot of the distribution costs."

About Nu-Energie

Nu-Energie, LLC is a biodiesel producer, headquartered out of Blountville, TN which will take virgin oils and turn them into a clean renewable fuel on an annual rate of 5 million gallons.
